

Caratterizzazione dei difetti di verniciatura

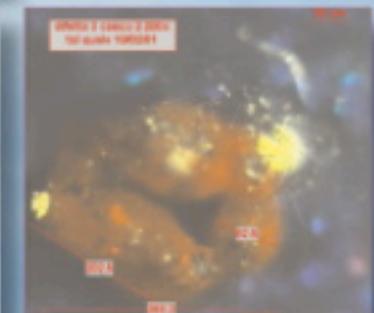

**1. Rilevazione
dei difetti**

**2. Osservazione
dei difetti al
microscopio
ottico**

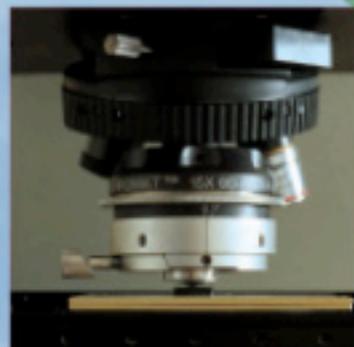

Difetto 1

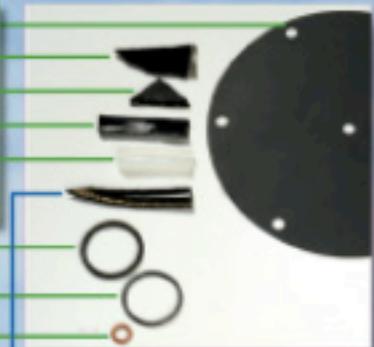

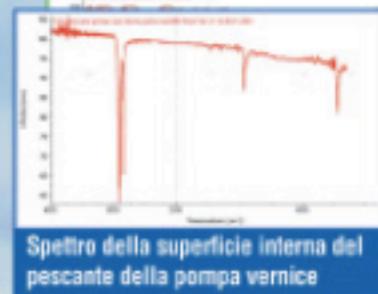

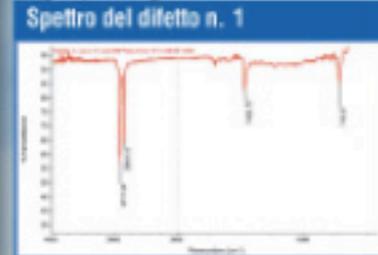

Difetto 2

3. Analisi in microspettrofotometria

Obiettivo con cristallo di silicio
del microscopio FT-IR.
Risoluzione 20 µm

**4. Analisi
dei possibili
materiali
inquinanti**

**5.
Individuazione
dei materiali
inquinanti
causa di difetti**
